DETERMINATION OF SIGNIFICANCE (DS) AND ADOPTION OF EXISTING ENVIRONMENTAL DOCUMENT

Name of Proposal: DS/Adoption 14-012: AQUATIC INVASIVE SPECIES
MANAGEMENT PERMIT

Description of Proposal:

WDFW serves Washington's citizens by protecting, restoring and enhancing fish and wildlife and their habitats, while providing sustainable wildlife-related recreational and commercial opportunities. WDFW helps to meet this mission through the strategic goals of preventing the introduction of new nonnative invasive aquatic animals and controlling or eradicating established populations. WDFW's Aquatic Invasive Species (AIS) Unit proposes the use of pesticides listed under this permit in condition S4 to control or eradicate nonnative invasive aquatic animals that pose the greatest threat to Washington State. Use of pesticides would occur in state freshwater, brackish, estuarine, or marine waters depending on the invasive species. Size of the project and site will vary greatly depending on the species as well. Conditions of Ecology's Aquatic Invasive Species Management General Permit will be followed. See also Washington Department of Ecology's Non-Project Environmental Impact Statement.

Proponent/Applicant: Washington State Department of Fish and Wildlife (WDFW)
Contact: Jesse Schultz
600 Capitol Way North
